Contents

Publisher's Note 1

Research Papers

Simulation of streamflows for ungauged catchments
Taffa Tulu (Rostock, FRG) 3

Effects of partial deforestation on hydrology and salinity in high salt storage landscapes. I. Extensive block clearing
J.K. Ruprecht and N.J. Schofield (Leederville, WA., Australia) 19

Effects of partial deforestation on hydrology and salinity in high salt storage landscapes. II. Strip, soils and parkland clearing
J.K. Ruprecht and N.J. Schofield (Leederville, W.A., Australia) 39

Hydrochemical variations in spruce, beech and grassland areas, Mont Lozere, southern France
P. Durand, C. Neal (Wallingford, UK), F. Lelong and J.F. Didon-Lescot (Dijon, France) . . 57

Post-deforestation Amazonian climate: Anglo–Brazilian research to improve prediction
W.J. Shuttleworth, J.H.C. Gash, J.M. Roberts (Wallingford, UK), C.A. Nobre, L.C.B. Molion (São Paulo, Brazil) and M. de Nazare Goes Ribeiro (Amazonia, Brazil) 71

Flow parameters in a shallow conduit-flow carbonate aquifer, Inner Bluegrass Karst Region, Kentucky, USA
J. Thrailkill, S.B. Sullivan and D.R. Gouzie (Lexington, KY, USA) 87

Eliminating the effect of temperature from unsaturated soil hydraulic functions
S.G. Giakoumakis and G.P. Tsakiris (Athens, Greece) 109

Point snowmelt models with different degrees of complexity — internal processes
G. Blöschl and R. Kirnbauer (Vienna, Austria) 127

Water balance and soil moisture dynamics of field plots with barley and grass ley
H. Johnsson and P.-E. Jansson (Uppsala, Sweden) 149

The use of stable isotopes in quantifying groundwater discharge to a partially diverted creek
M.L. Space, N.L. Ingraham and J.W. Hess (Las Vegas, NV, USA) 175

Saltwater intrusion into a small coastal aquifer (Rio Verde, Almuñecar, southern Spain)
M.L. Calvache and A. Pulido-Bosch (Granada, Spain) 195

An analytic element model for transient axi-symmetric interface flow
H.M. Haitjema (Bloomington, IN, USA) 215

Evaluation of the usefulness of historical and palaeological floods in quantile estimation
S.L. Guo and C. Cunnane (Galway, Ireland) 245

The POT model described by the generalized Pareto distribution with Poisson arrival rate
Q.J. Wang (Galway, Ireland) 263

On the physics of droughts. I. A conceptual framework
L. Bravar and M.L. Kavvas (Davis, CA, USA) 281

On the physics of droughts. II. Analysis and simulation of the interaction of atmospheric and hydrologic processes during droughts
L. Bravar and M.L. Kavvas (Davis, CA, USA) 299

Estimation of suspended-sediment rating curves and mean suspended-sediment loads
C.G. Crawford (Indianapolis, IN, USA) 331

A model for oxygen transport and consumption in the unsaturated zone
J.C. Refsgaard, H.C. Ammentorp (Horsholm, Denmark) and T.H. Christensen (Lyngby, Denmark) 349

The chemical composition of precipitation and runoff water on an arid limestone hillside, northern Negev, Israel
A. Yair (Jerusalem, Israel), A. Karnieli and A. Issar (Sede Boqer Campus, Israel) 371

Discussion

Computation of the instantaneous unit hydrograph and identifiable component flows with application to two small upland catchments — Comment
P. Young and K. Beven (Lancaster, UK) 389

Book Reviews

Hydrology of Moist Tropical Forests and Effects of Conversion: A State of Knowledge Review 397
Balancing the Needs of Water Use 399
